Industry Solutions

BizPortals 365 is a business-centric, cloud-based, modern intranet that turns your organization into a cohesive, collaborative environment, which improves the way people work together. It is more than just an intranet and offers a comprehensive and easily customizable solution to meet the specific needs of companies across all industries and sizes.

Manufacturing

In today's competitive environment, manufacturing industries need to quickly respond to any shifts in their markets. BizPortals 365 is well equipped to provide employees fast, efficient access to information, digital forms to request materials or place orders, and tools for real-time communication between employees as well as with partners and suppliers - keeping everybody on the same page.

Healthcare

The healthcare industry is fast-paced and constantly evolves. It is crucial to update staff with news, policies & procedures, patient information, weekly staff schedules, and provide tools for communication, enhance training efforts, automate processes to improve patient care. BizPortals 365 supports all these needs while also providing mobility to frontline staff who are always on the go.

Law Firms

Law firms deal with a large volume of documents that can be scattered when a case requires the collaborative efforts of specialized team members. BizPortals 365 provides productivity and efficiency to a law firm's staff by providing robust search features, updated information, and team & case management sites for improved communication and collaboration across a firm.

Industry Solutions

Oil and Gas

The energy sector deals with different geographical locations and highly fluctuating connectivity, and employees require remote access to the right information in real-time. Take advantage of digital workplace solutions to overcome the pressing engagement and productivity challenges of the energy industry. BizPortals 365 ensures seamless employee collaboration for remote offshore operations, oil field exploration, extraction, refining, and recovery. Focusing on hitch-free internal communications and collaboration ensures superior productivity and better customer services to take your company performance to the next level.

Retail

The retail industry has undergone a major shift; from physical to digital. This means more information, diverse employees, and a need for better connectivity and control. BizPortals 365 can help with information dispersal, simplifying inter-store communications regarding stock levels, services & deliveries, and provide quick online training through videos and presentations.

Financial Institutions

Compliance plays a pivotal role in bank operations making training, security, and governance procedures very important. They also need quick retrieval of information and automated retention and archival procedures. BizPortals 365 provides Microsoft security and backup features and multi-level, granular permissions systems, which ensures the safety of all information.

BizPortals 365

Industry Solutions

Information Technology

The role of IT has changed over the past several years from responding to technology requests to a more central role in bringing value to businesses - managing large amounts of data, cybersecurity, etc. BizPortals 365 is a comprehensive cloud-based solution with plenty of self-help features. It requires minimum IT involvement, allowing them to spend more time on strategic activities.
