

Office 365, Dynamics 365 and SharePoint Services

Consulting Services

Our team of Microsoft certified architects, experts, and developers can help with installing and configuring Office 365, Dynamics 365, and SharePoint, upgrading and enhancing existing installations, deploying add-ons, developing custom solutions, migrating data, and integrating with other business systems. Before starting the project, we meet with IT and business stakeholders to interview them and gather requirements, make and review recommendations, perform testing, and prepare documentation.

Our consulting services include:

- Business analysis
- Consulting and configuration
- Customization
- Integration with enterprise systems
- Migration
- Training
- Support and maintenance

OVERVIEW

Organizations are adopting Microsoft technologies rapidly to increase collaboration, centralize knowledge, and develop solutions that engage and empower employees. As a trusted Microsoft Gold Partner for 15 years, BizPortals Solutions has expertise in developing intranet and digital workplace solutions and providing related services. Our goal is to help you accomplish your business objectives and enable a more informed, engaged, and productive workplace for your employees. We are a full-service software and services company solely dedicated to organizations using Office 365, Dynamics 365, and SharePoint, and our mission is to be your intranet and digital workplace advocate.

Support Services

Once your custom solution is implemented, we can help maintain and upgrade it, so it performs soundly. With our top-of-the-line support, you can focus on your customers while we keep your solution upgraded and running smoothly.

Our Support services include:

- Regularly installing service and feature packs to ensure flawless performance and taking advantage of product enhancements
- Installing security patches and upgrades to guarantee a protected environment for work and collaboration
- Enhancing and adding new custom features to your SharePoint solution to keep it modern and attractive to your users

ABOUT BIZPORTALS SOLUTIONS

Based in Orange County, CA with offices in Boston and India, we have over 130 employees comprised of Office 365, Dynamics 365, and SharePoint experts, developers, software architects, solution consultants, and customer success representatives. We have been trusted Microsoft Gold Partners for over 15 years and have an abundance of knowledge and experience, working on the Microsoft platform.

Data Migration Services

We can help you bring over all your data, whether on premise or in the cloud, to SharePoint. This includes your users, email, documents, contacts, etc. Our team of experts work with you to ascertain your organization's specific requirements and create a roadmap for your migration to make it organized, efficient and manageable.

- Pre-migration activities: we conduct a thorough analysis of your existing data and deployments and fix inconsistencies in preparation for a smooth migration.
- Migration to Office 365: depending on the amount of data you have we will decide whether we should migrate in one go or break it up into phases. We can also do a hybrid migration where we keep some components on premise and move the rest to the cloud.
- Post-migration training and support: we provide ample training and support for your users, IT specialists, and site administrators.

SharePoint Integration Services

BizPortals Solutions always looks for innovative ways to integrate SharePoint with other leading technologies to bring all the tools and technology you use on one platform. We are always up for discussing your specific integration project that might include:

- Email integration with Outlook, Exchange, Gmail, etc.
- Integration with collaboration solutions like Office 365, Yammer, Microsoft Teams, etc.
- Social media integration
- Integration with multiple custom solutions like CRM, ERP, financial systems, document/content management, project management, and Dynamics 365 systems.

Dynamics 365 Customization Services

With countless options to develop and customize the platform, Dynamics 365 can contribute significantly to your business growth. This suite of apps including sales, finance, operations, customer service, and talent break down the silos between ERP and CRM, and helps you capture new business opportunities. Our team of Microsoft certified experts offers the most user-friendly Dynamics 365 implementation and customization services. We will help you leverage the system to improve business efficiency and empower your business. Our services include:

- In-depth investigation to ascertain your specific requirements and create a roadmap for your organization.
- A complete range of Dynamics 365 development services and integration with existing enterprise platforms.
- Building and extending Microsoft Dynamics 365 capabilities by creating custom tailored solution to solve your business needs.
